## STOCK EXCHANGE FEATURES FIRM

Brief Session On Floor Today Shows Steadiness in Coppers and Affiliated Shares.

New York, Feb. 19.—Coppers and affiliated shares, like Butte and Superior and American zinc, were the chief features of today's dull but firm stock market, with new records for Utah and Chino. American Smelting and Mexican Petroleum also rose substantially on more favorable Mexican advices.

Some of the tobacco crop and other specialties were better by from 1 to 4 points and distinctive war stocks were 1 to 2 points higher. Marine preferred, Fertilizers and Pittsburgh Coal common and preferred shared variably in the rise. United States Steel was firm and Bethlehem rose 10 1/4 to 47 1/4. Ralls and motors were the backward features. Gains were materially reduced later. The closing was irregular.

Bonds were steady. Further improvement in prices was registered on the resumption of stock trading today, all active issues, except rails and Baldwin locomotive scoring gains, from fractions to over a point. Metal shares were again most prominent. United States Steel held at a slight gain and other shares of that class were firm. Among recognized war issues General Electric led with an advance of 1 1/2. American Coal Products featured the high priced specialties with a gain of four points.

## WHEAT DROPS AT GREATER SUPPLY

Liberal Receipts in the Northwest Let Bears in for Plenty of Action in Lists.

Chicago, Feb. 19.—Liberal receipts northwest had a bearish effect today on wheat. Opening prices, which ranged from unchanged to 1/4c higher, with May at 1.29 1/2 to 1.30 1/2 and July at 1.24 to 1.24 1/2, were followed by a substantial decline all around.

Apparent absence of any important European buying led afterward to a decided setback. The close was heavy, 1 1/4 to 2 1/4c net lower, with May at 1.27 1/2 to 1.27 3/4 and July at 1.22 1/2 to 1.22 3/4.

Corn eased off with wheat. Trade was mainly of a local character. After opening unchanged to 1/4c lower, the market underwent a moderate general sag.

Bullish estimates of the Argentine exportable surplus failed to prevent an additional decline. The close was weak at a loss of 1 1/4 to 1 1/2c net.

Oats had no independent action. Depression resulted from the weakness of other grain.

Strength developed in provisions on account of a speculative demand for lard. Selling was scattered.

**Little Heard of War Gases.**  
Paris.—Correspondence of The Associated Press.—Very little is heard now of the effects of suffocating gas at the front, though the official communique frequently mentions attacks in which it has been used.

The report some months ago that 5,000 French soldiers succumbed to it in the Argonne through neglect to distribute protecting masks, seems to have been forgotten and in the absence of other reported casualties anxiety seems to have disappeared. Abbe Moreaux, director of the Bourges observatory, explains why the Germans are at a great disadvantage on account of the winds, and how the allies could dominate them in that kind of warfare if they saw fit.

"The battle front, excepting between Noyon and Verdun, runs in a generally northerly-southerly direction, the rest of it east and west, while the north of France and Belgium are all the year round subjected to general Atlantic winds; that is to say, winds varying between west and southwest," he says.

"My calculations, based on the central meteorological bureau statistics, show that only 28 times in 100 during the entire winter on an average has the wind blown from the east, southeast or northeast; consequently in the winter season a German gas attack has only 28 chances in a hundred of success, while an attack by the allies with the same arm has 72 chances in a hundred on the fronts running from north to south. On the front running from east to west the conditions are less favorable to the allies, the north winds being in the ratio of 30 in 100 in winter, and 40 in 100 in spring, 38 in 100 in summer and 28 in 100 in autumn."

Summing up his calculations, Abbe Moreaux thinks the Germans have less than one chance in three the year round, while the allies have more than two chances in three of effective use of suffocating gas.

**Smart Dog.**  
Smith—Is that dog of your smart? Brown (proudly)—Smart? Well, I should say so! I was going out with his yesterday, and I stopped and said, "Towser, we have forgotten something." And bothered if he didn't sit down and scratch his head to see if he couldn't think what it was.—Buffalo News.

**Dr. Evans on Local Vaccination Cases.**—According to Dr. W. A. Evans, the Tribune health expert, Davenport is poorly vaccinated. In his daily story yesterday, he described the situation in Davenport as being serious. The view taken by Dr. Evans is the same taken by City Physician Dr. George Middleton. Davenport physicians in discussing the situation agree with both our local city physician and

The king of Montenegro and his entire family have fled their country and are now in exile at Lyons, France. In the meanwhile, the conquered Montenegrins are getting along as best they can. This photo was taken in Lyons this month, and just reached this country.

## The Day in Davenport

### Opposes Police on Greeks Raid.

Have the police the right to break into a building at night and arrest men on a charge of gambling? This is the question raised by Attorney M. V. Gannon as attorney for Jim Kororas, a Greek, charged with gambling. Kororas was fined \$100 and court costs on the charge in police court yesterday morning. When the fine was announced by Magistrate Roddewig Attorney Gannon gave notice of appeal to the supreme court. Mr. Gannon defended his client on this theory of law.

### Will Get Share of Panama Fund.

Four Davenport men, M. W. Kinney, Daniel Kinney, Charles Miller and Mose Mason, will share in the fund to be appropriated by congress in recognition of the civilian employees of the Panama canal. Literature bearing on the subject, including copies of the bills to be introduced in both the house and senate, has been received here and it is likely that they will be passed. In former bills the army and navy has been recognized by the congress of the United States for services rendered at the canal. The civilians, however, were neglected. An organization was formulated on behalf of the civilians and now the bills are pending. The purpose of the bills before the national congress is to reward the civilian employees with a sum of money equal to two months pay for each year they were employed on the canal. This is to be based on the salaries drawn by them during the month of March, 1914.
